MATADOR® STRAP-LOCK BONGO STAND
ASSEMBLY INSTRUCTIONS

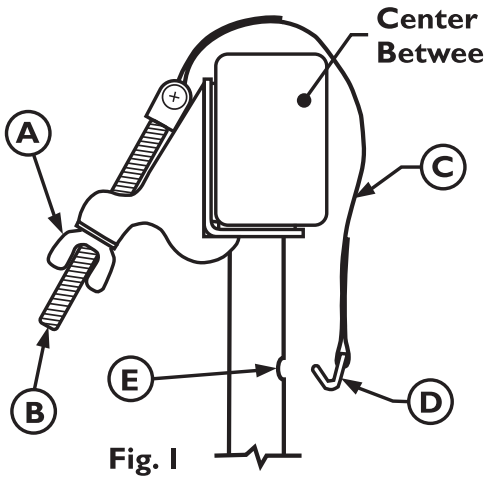

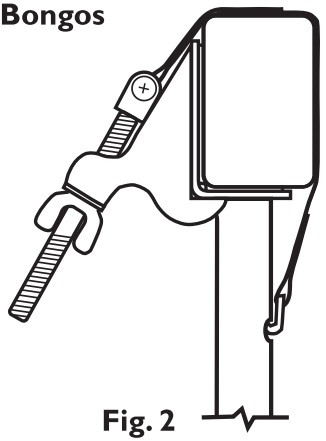

Fig. 1

Fig. 2

BONGOS DO NOT NEED TO BE DISASSEMBLED TO BE ATTACHED TO STAND.

1. Place the bongos on the stand. The center block must sit squarely against the rubber pad. Be sure the strap is out of the way.
2. See Fig. 1. Loosen the tension bolt (B) by unscrewing the wing nut (A).
3. Feed the strap (C) and hook (D) over the center block and between the drum shells. The strap must wrap around the center block as shown in Fig. 2.
4. Insert the hook (D) into the hook slot (E). Loosen or tighten the wingnut (A) until the strap is the proper length allowing the hook to reach the slot.
5. Tighten the wingnut until the strap is tight and the bongos are secure. NOTE: The strap must be tight enough that the bongos do not move while being played.
