Martin M-Play

- Perfect control surface companion for M-PC
- Innovative control surface as introduced with the Martin M-Touch
- Featuring 12 FSR faders to control playbacks
- 48 velocity-controlled pads let you access playbacks and function keys of any kind
- One DMX 512 universe for direct control of any compatible DMX device
- Plug-&-Play wing for M-PC and M-Series consoles

The control surface revolution continues!

Martin[®]
by HARMAN

Perfect companion to M-PC

- Martin M-Play is a USB wing for M-PC
- Connects to M-PC for immediate output of one Universe
- Combines with M-DMX for up to 4 Universes without the need of a Martin One-Key
- Can be used with or without its M-Touch sibling

Martin[®]
by HARMAN

M-Play for Console Expansion

- Martin M-Play can also be used as a wing/expansion for any M-Series console
- When connected to a console, M-Play provides additional faders and buttons
- Multiple M-Plays can be connected to the same console

Innovative touch surface

Martin
by HARMAN

Force Touch

- Force Touch controls are unique for a lighting Controller
 - Velocity sensitive pads control the intensity of effects based on touch pressure
 - Buttons are backlit with colored LED's for visual feedback
- Force Touch features enable amazing dynamic effects, for example:
 - A strobe effect could have a different intensity based on the force applied to the button
 - A color bump could get different levels of saturation

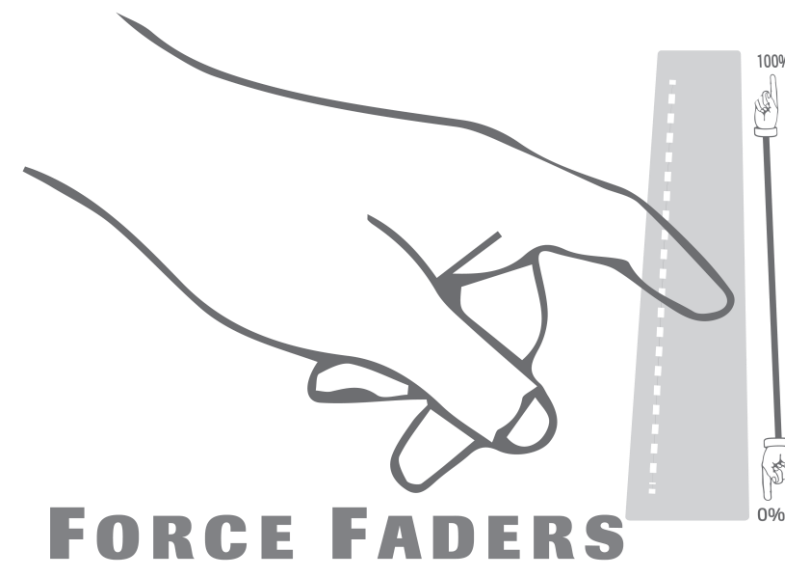

FORCE TOUCH

Force Faders

- Force Faders is a new innovation in faders using Force Sensitive Resistor (FSR) technology
 - Provides instant, accurate and reliable intensity control at your fingertips
 - A column of LEDs provide visual feedback of the fade levels
- Force Faders allows for unique control possibilities:
 - Direct jump to any value
 - Gradual or immediate level transitions as desired
 - Maximum control capabilities impossible with conventional faders

I survived

Look at this brand new M-Touch after a spending a week at Burning Man. Ran like a beast in one of the harshest environments on earth. Experienced freezing to burning hot temperatures on a daily basis, frequent alkil dust white-outs without a cover - no issues.

Adam LaBay, Future Weapons

Simplicity is Key

- No complex MIDI setup
 - MIDI devices can be difficult to configure
 - MIDI Configuration requires extensive knowledge and time for setup
- Martin M-Play is a simple and powerful Plug&Play solution for M-Series

Martin[®]
by HARMAN

1...2... Go!

- Connectors on the Martin M-Play were conveniently placed on the left side to allow an M-Touch on the right side without obstructions
- The XLR 5-pin connector will send 512 channels of DMX directly to any compatible lighting device
- Simply connect the USB-powered Martin M-Play to a PC running M-PC software
- Go! Start operating the light show!
