

analogue guitar combos & speaker cabs close miking

off-axis
super-cardioid
dynamic microphone

The new alternative to replace or augment mikes on stands and their associated pitfalls; a revolutionary approach to analogue close-miking of guitar combos and cabinets.

Fast achieving word-wide status for reliability and performance. Now recognised as a significant innovation by amateur and professional guitar players, engineers, and record producers alike. **INTEGRAL**.

INTEGRAL - sound improvements

- Accurate and powerful **analogue** sound
- Helps **prevent overspill and feedback**
- **Ideal frequency range** and **extreme volume** capability
- Optimised **off-axis mounting**
- Very **high quality super-cardioid** microphone

INTEGRAL - technical improvements

- Quick, **easy fit-and-forget** speaker cab installation
