

THE BROS LANDRETH

REVV

REVV
Dirtdog

1. Input	Guitar in.
2. Output	Out to amplifier.
3. Power	See requirements below for safe operation.
4. Gain	Adjust gain level.
5. Bite	Adjust treble level.
6. Footswitch	Engage or disengage pedal.
7. Level	Adjust output level.
8. Tone	Adjusts overall midrange response.

The Power Requirements.
Recommended Voltage: 9VDC. Current (Amperes) Minimum: 18mA. Isolated Center Negative Tip External Supply Only.

Getting Started

Ensure the Dirtdog is powered properly. Adjust Level to a comfortable volume & sweep the full range of the knobs to familiarize yourself with their operation. Note the difference between high Gain & Level settings The Dirtdog's controls are interactive, so listening for a character you enjoy & exploring further is essential.

Using The Dirtdog

When the two-time Juno-winning Bros. Landreth set out to create Dog Ear, a deeply personal record inspired by their spontaneous live sound, Joey built a handmade amp based on small, easy-to-distort amps dating back to the '40s. He used it for lots of the gain tones & wanted a reliable way to bring that sound on the road. That's where the Dirtdog comes in. The Dirtdog has a broad, organic distortion like oldschool amps. It's designed for gritty gain at maximum settings, but it can also be used to sweeten up your cleans & provide those coveted 'edge of breakup' dynamics to your playing. At its core, you'll find a musical & harmonically rich overdrive that reacts to your playing. Its chewy midrange makes it well suited to classic tones whether they're subtle & subdued or completely over the top.

Bite & Tone

The Bite knob is a great place to start because it sculpts treble. It helps pair the Dirtdog with your rig's natural sound, but can also push extra treble for an articulate, biting tone, or create a very warm distortion great for rhythm or solos. The Tone knob is similarly powerful, broadly reshaping the midrange response from a snarlier, punchy sound towards the right to a more scooped chewy sound to the left. Because the Dirtdog can be used in many ways, it's possible that your favorite sound is an extreme setting. Use your ears & once you find a sound - test how other controls affect it.

Warranty

Please fill out the form on the website below within the next 30 days to claim your warranty. Revv Amplification will repair or replace: defective workmanship or materials at its discretion on all new Revv Amplification products purchased directly or through authorized dealers for one year from the day of purchase. This warranty does not cover shipping costs, product appearance, or damages caused by accident, abuse, alteration, or misuse. No other warranty is expressed or implied. **WWW.REVVAMPLIFICATION.COM/WARRANTY**

1. Clean Boost

2. Rootsy Twang

3. Rock Machine

4. Clip Fuzz

Note: that these are starting points - adjust to taste based on your amp, guitar, and playing style.
