| 1. Product Identification Code                         | Truss Holder FA34-FA44 (8013)                                                              |
| 2. Type, Structural System                             | FA-HOLDER (8013)                                                                           |
| 3. Usage                                               | Strenght bracket for aluminium structures FA34-FA44                                        |
| 4. Manufacturer                                        | TAF - TRUSS ALUMINIUM FACTORY a.s., Hodolany 1226, 779 00 Olomouc-Hodolany, Czech Republic |
| 5. Evaluation System                                   | 2+                                                                                         |
| 6. Identification Number of Certification Organization | 2451                                                                                       |
| <b>7. Product Details:</b>                             |                                                                                            |
| Toleration and Geometrical Information                 | EN 1090-2                                                                                  |
| Weldability                                            | NPD                                                                                        |
| Fructural Toughness                                    | NPD                                                                                        |
| Loading Capacity                                       | Static Calculation No. O-01/2016 Truss Holder_FT34-HT44 according EN 1990, 19991-1         |
| Usage Deformation in Limit State                       | Static Calculation No. O-01/2016 Truss Holder_FT34-HT44 according EN 1990, 19991-1         |
| Fatigue Life                                           | NPD                                                                                        |
| Fire Resistance                                        | NPD                                                                                        |
| Fire Reaction                                          | Material Classification: Class A1                                                          |
| Cadmium Release                                        | NPD                                                                                        |
| Radioactivity Emission                                 | NPD                                                                                        |
| Durability                                             | Surface untreated                                                                          |
| <b>8. Structural Characteristics:</b>                  |                                                                                            |
| Design                                                 | Production documentation 8013 (Závěs 1t F30-F40)                                           |
| Production                                             | According the segment specification and EN 1090-3 class EXC1                               |

Product characteristics mentioned in points 1 and 2 are in compliance with characteristics listed in point 7. Manufacturer listed in point 4 takes all responsibility for issue of this "Certification of Conformity".
