## Showtec Case for 4x Photon Strobe/Wash/Sunstrip

*Penn Elcom butterfly latches & lid  
handle - swivel wheels with brake*

EAN: 8717748624635

The Showtec Case for 4x Photon Strobe/Wash/Sunstrip is a dedicated case for four Showtec Photon Strobe, Wash or Sunstrip fixtures. Measuring 600 x 1200 mm, it is designed to make the most of standard truck dimensions. It uses high-quality 9 mm plywood and Penn-Elcom hardware to offer reliable protection for touring, rental and venue environments. Dedicated compartments are provided for cables and brackets, as well as space for four Beamshapers and four Barndoors. The brackets can be removed from the fixtures and stored in the accessory section, or left attached to the fixtures, which also fit in the case with the brackets on. The foam interior keeps the Fixtures safe during transport and storage. The case is fitted with four swivel wheels with brakes for easy manoeuvrability. It also has handles in convenient places and stacking dishes for securely stacking multiple cases.

This flight case features an Easy Tip design, allowing the wheels to be mounted either further inward for easier tipping during loading and unloading, or further outward for increased stability - depending on the user's preference.

### Special features:

- Foam interior for maximum protection
- 9 mm high-grade plywood construction
- Penn Elcom butterfly latches and lid handle
- 100 mm castors with brakes
- Multiple accessory compartments
